

## FALCON: Precision that pays

### Technical data:

Housing dimensions (mm/inch)	
Length with/without check-weigher	3,780/2,660; 148 <sup>4</sup> / <sub>5</sub> "/104 <sup>7</sup> / <sub>10</sub> "
Width	1,377; 54 <sup>1</sup> / <sub>2</sub> "
Height	1,858; 73 <sup>1</sup> / <sub>2</sub> "
Weight (kg/lb)	
Machine (50 Hz/60 Hz)	750/790
Check-weigher with pusher	350
Weight accuracy (%) (depending on the product and throughput)	+/-1
Calculation of the optimum slice thickness to achieve the target weight	✓
Individual selection of different parameters, e. g. weight tolerance, sorting procedure, etc.	✓
Up to 100 cutting programs can be saved with allocation of user rights	✓
Cutting statistics (operating data recording)	✓
Check-weigher with 3-times sorting device	✓

### The benefits for you at a glance:

- Precisely weighed cutting – not just on boneless but also bone-in, tough smoked and slightly frozen products
- 360° Scan
- Fast amortisation due to variable use with regard to the product range and applications
- Clean cuts due to “sandwich” guiding device of blade
- Easy operation by touchscreen
- Innovative software with allocation of user rights over four levels as well as remote maintenance and online software update
- Unfolding mechanism for quick cleaning
- Compatible with all processing machines on the market
- Weight controlled portioning taking account of slice thickness
