AFMG-52 Heavy Duty Mixer Grinder

FEATURES:

7.5 HP (5.6 kw) motor (or optional 10 HP, 7.5 kw) and size 52 head can provide an output of up to 100 lbs per minute.

Separate auger and mixer motors mean no clutch to wear out or break, which equates to lower maintenance cost.

Heavy duty roller chain drive and tapered roller bearings provide simple, efficient and low maintenance auger drive with no gearbox to replace. Lower maintenance costs mean higher profits.

Heavy duty stainless steel 200 lb. hopper and frame resist corrosion and damage. Your mixer grinder lasts longer, and you get a better return on your investment.

Power, durability, and low maintenance make the AFMG-52 the mixer grinder of choice for large supermarkets, medium sized processors and HRI plants.

SPECIFICATIONS:

ELECTRICAL Auger: 7.5 HP, 5.6 Kw (10 HP, 7.5 Kw optional)

Mixer: 1 HP, .75 Kw, 208-230-440 Volts, 60 Hz, 3 phase

CONSTRUCTION Heavy duty stainless steel 200 lb. hopper and frame. Hot tin dipped bowl, ring, and auger (optional stainless steel).

CAPACITY Output up to 100 lbs per-minute
